	Long	390g 13.8oz	1.6L	Ø11 x 13cm Ø4.3 x 5.1in	183–195cm 6ft–6ft 3in	155cm 61in
Sp2	Reg	464g 16.4oz	2.9L	Ø13 x 13cm Ø5.1 x 5.1in	< 183cm 6ft	146cm 57in
	Long	510g 18oz	3.0L	Ø13 x 14cm Ø5.1 x 5.5in	183–195cm 6ft–6ft 3in	155cm 61in
Sp3	Reg	625g 22oz	3.7L	Ø15 x 15cm Ø5.9 x 5.9in	< 183cm 6ft	146cm 57in
	Long	690g 24.4oz	3.9L	Ø15 x 17cm Ø5.9 x 6.7in	183–195cm 6ft–6ft 3in	155cm 61in

Using the warmth of 850+ loft 90/10 goose down, the amazing moisture protection of Ultra-Dry Down, and a micro-weight 10D shell and 15D lining, we have created one of the best warmth for weight minimalist sleeping bags available.

The Spark is an ultra light bag with several key uses. Its balance of size, weight and warmth make it excellent as a summer sleeping bag, especially for weight and space concious cycle tourers and ultra light walkers. Its size and warmth rating works well as a booster bag, slipping inside another sleeping bag to add one or two seasons to its rating. The Ultra-Dry Down protection makes it an impressive hard-alpine or adventure racing sleeping bag, where down has never before been a viable option, and weight is simply not tolerated.

The secrets of the Spark's warmth to weight are in the premium quality down and micro-weight shell and liner fabrics, the 1/3 length light-gauge #3 YKK zip and the baffle constructions. The Sp1 uses sew through construction for minimal weight. The Sp2 is a blend of box-wall baffles through the torso and sewn-through construction on the legs. The Sp3 is fully box-wall baffled and includes a draft tube for maximum warmth from the Spark configuration.

The Spark compresses so small, we had to re-engineer our compression-sacks to make one that reduced sufficiently.

Features:

- Amazing warmth for weight
- Sleeping bag weight: Sp1 348g | 12.3oz; Sp2 464g | 16.4oz; Sp3 625g | 22oz
- 850+ loft Ultra-Dry Down fill
- 55/45 top/bottom differential fill ratio
- 3D Differential cut drawcord hood
- Contoured mummy shape with 1/3 length zip
- Transverse baffles for maximum loft
- Ultra-Dry Down protection for use in any conditions
- 10D Pertex Quantum shell fabric treated with DWR
- 15D nylon soft touch, high density weave lining
- 1/3 length #3 YKK zip minimises weight and bulk
- Tapered shaped box foot construction to minimise cold spots
- Comes with Sea to Summit's Pack, Store, Wash system: 15D Ultra-sil micro compression sack (only 32g | 1.1oz), mini storage cell and small wash bag
- Colour: Translucent Silver outer, Yellow inner
