

# Helium 1

## Product Description:

The Helium 100's hybrid tunnel design, ease of pitching and fully taped seams make this lightweight tent a welcome shelter at the end of a day on the hills. TBS® Pro and pre-bend poles offer exceptional stability, and vents allow for a through flow of air reducing any condensation build up. Light weight and a compact pack size make the Helium ideal for short trips without compromising function.

## Colors:

Alpine Green

## Product Details:

Total Weight:	1.23
Pack Size (CM):	43.0 x 14.0 (L x D)
Pegs Weight (KG):	0.06
Poles Weight (KG):	0.26
Bags Weight (KG):	0.02
Fly Sheet Weight (KG):	0.44
Inner Weight (KG):	0.44
Pitching Time (MIN):	7
Capacity:	1 Person Tent

## Features:

- Hoop Tent with Strut Poles
- Flysheet: 20D Ripstop Nylon 6 / 3000mm HH / Siliconised / PU Backed
- Groundsheet: 70D Ripstop Nylon 6 / 5000mm HH / PU Backed
- TBS® PRO - Internal Guying System using an ultra-lightweight dyneema cord
- All in One Pitching - flysheet and inner pitch together, simple and quick to pitch and strike
  - Siliconised/PU Backed - the outer face is given a siliconised coating to enhance the water repellency, increase tear strength and protect against UV degradation. The underside has a polyurethane coating for waterproofing and to allow the seam tape to effectively bond with the tent
  - Groundsheet: 70D Ripstop Nylon fabric is a great balance between low weight and high durability
  - PU Backed groundsheet to stop all water ingress and to allow the seam taped
  - All flysheet and groundsheet seams are factory taped, giving a water tight seal
  - Yunnan Poles, high quality lightweight poles designed and made by Yunnan in Korea
    - Conveniently positioned internal pockets within the inner tent to keep small items organised
    - By incorporating a pre-angled section into the pole more internal space is achieved than with a standard arch. Additionally, the section braces effectively against side winds.
    - Ultralight Titanium Pegs
    - Breathable inner fabric allows condensation to pass through, ensuring a comfortable nights sleep. Ripstop weave for extended durability.
    - The constant curve of the inner doors enables the door to be opened in one movement, using one hand. The door has a mesh panel in the upper half for extra ventilation
      - Part mesh inner door - Increases ventilation in the inner tent while keeping bugs out
      - Bathtub groundsheet, completely waterproof, 10cm base on the inner tent with taped seams for times when you need to pitch on wet ground
      - Main and Secondary doors for kit storage and easy entry from both sides in prevailing winds
      - Flysheet door can be opened to ventilate the porch area of the tent by opening the door from the top with the second zip runner
      - Flysheet vents with mesh coverings allow vapour to pass through, reducing condensation, but keep the bugs out
      - Orange high strength guylines have a high strength core with an orange sheath which is easy to see, even in low light conditions
      - Mini Line-Lok guyline runners- lightweight, easy to use runners won't slip when under pressure in strong winds.
      - Dyneema Pegging Points which can be modified for use with skis or snow anchors
      - Pole sleeve tension adjusters keep the flysheet taut, therefore enhancing weather resistance
      - Duraflex buckles and zip pullers which are renowned for strength, quality and reliability
      - The blink of a reflective tab in the beam of a head torch is a reassuring sight at the end of a long day. Multiple reflective points on the pole sleeves, pegging points and vents ensure that the tent is picked up by your light
      - Lightweight stuffsac
