SIZING / FIT

KID'S SIZING AND FIT

Correct fit and sizing is vital for kids heading out on the trail. Kids, like adults, need to have their hips and torso measured to determine the appropriate size pack. The Ace Series' adjustable harness system and Fit-on-the-Fly™ hipbelt offers a wide range of sizing options. This allows each liter version of the Ace to fit a wide variety of users as well as adjust in size for kids as they grow. Along with fit and sizing, it is recommended to limit the pack load to 15-20% of the user's body weight. More than this could put excessive weight on the spine and back muscles and cause injury. Please help make the experience enjoyable and safe for the future generations of the outdoor community.
