# A TENT REVOLUTION.

- > No pole assembly required
- > Engineered in Australia for our unique conditions

**THE AIR-VOLUTION™ TENT IS EASY TO SET UP AND PACK DOWN. AIR POLE INFLATION TIME FOR THE AT-4 (FOUR PERSON) IS LESS THAN A MINUTE, WITH THE AT-6 (SIX PERSON) HAVING AN INFLATION TIME OF JUST OVER A MINUTE.**

An innovative design with the flysheet attached to the outer air poles, a 120 mm gap is created between the flysheet and inner tent, providing constant airflow. The inner roof consists of a fully breathable textile, further maximising ventilation and reducing condensation build up. Large windows with gussets also allow for excellent airflow in all weather conditions.

TENT MODELS
