STANDARD OVERHANG TARPS 75D POLYESTER

Engineered tarps for shelter in every season. This economy range of Overhangs uses our regular 75 denier, waterproof, polyester tent fabric. The tensile design engineering and construction quality incorporated in all our Overhangs are world leading. Carefully cut panels, non-stretch, reinforced ridges and perimeters and our original design tear-drop guy cord pockets combine with construction details to deliver the best-pitching and strongest tarps available. If you need group shelter or sun shade, enjoy the airy openness of fly camping or simply do stuff outdoors in all weathers, one of these Overhangs is for you.
